Arabic: Native

Full-stack mobile developer

Nidhal BOUMAIZA

Software Engineer and Freelance Full-Stack Mobile Developer with hands-on experience in mobile applications, real-time backends, and cloud platforms. Proven track record publishing production Flutter apps on App Store and Google Play (Al Manarah Advanced Co, Barberio) and delivering large-scale engineering platforms at eSteps Health (CIRO Pizza Platform with Flutter and Next.js 16 Web Admin). Passionate about building robust, scalable solutions and driving meaningful product impact.

PROFESSIONAL EXPERIENCE

AL Manarah Advanced Company (goLance) — 09/2025 - 09/2026

Mobile Developer (Flutter) • International Freelance Contract • Riyadh / Remote

- Engineered, optimized, and published **Maqra'at Al-Rajhi** on the **App Store** and **Google Play** (Quranic recitation & education mobile application).
- Implemented low-latency live audio streaming for remote recitation teacher-student sessions.
- Architected modular state management, dynamic session reservation slots, and offline caching.
- Delivered complete RTL (Arabic) internationalization and secure API consumption.

Barberio — Production Mobile Application — 01/2026 - 05/2026

Published on App Store & Google Play Store • Flutter, Supabase, Firebase

- Premier barbershop booking and salon management app in Tunisia. Features real-time schedule booking, portfolio galleries, push notifications, and verified customer reviews. 6 official Play Store screens.
- Designed and built end-to-end client booking pipeline, salon calendar sync, and automated push alerts.

eSteps Health — Software Engineering Intern (PFE Ingénieur) — 02/2026 - 09/2026

End-of-Studies Engineering Project (PFE) • Tunis, Tunisia

- Architected and delivered **CIRO Pizza Platform**: intelligent omnichannel quick-service restaurant ecosystem with robotic automation.
- Built 3 Flutter applications: **Customer Mobile App** (AI voice assistant & live tracking), **Interactive Totem Kiosk**, and **Delivery Rider App** with real-time GPS tracking.
- Developed full Web Admin Back-office in **Next.js 16**, React 19, and TypeScript with live rider dispatch map, Restaurant Intelligence AI demand analytics, and inventory threshold rules.
- Engineered real-time backend architecture and automated gateway for robotic order assembly supervision. Containerized with Docker.

Neopolis Development — Bachelor Graduation Intern (PFE Licence) — 02/2023 - 05/2023

Flutter / Express.js / MongoDB • Nabeul, Tunisia

- Developed mobile HR management application in Flutter and robust backend APIs with Express.js and MongoDB.
- Automated leave management workflows, IT equipment allocations, hierarchical approval processes, and shared corporate document tracking.

CPG Gafsa — Advanced Training Intern (Stage de Perfectionnement) — 01/2023 - 02/2023

Flutter / Node.js • Gafsa, Tunisia

- Created mobile application based on Node.js and Flutter to streamline tracking, department assignment, and evaluations for company interns.
- Implemented supervisor review modules, attendance registers, and automated grading reports.

Evolve'Com — Introductory Intern (Stage d'Initiation) — 01/2022 - 02/2022

CMS Prestashop / E-Commerce • Tunis, Tunisia

- E-commerce database maintenance, catalog optimization, and module configuration for commercial website (kmandi.net).
- Integrated product categorization, SQL data cleansing, and catalog performance improvements.

KEY ACHIEVEMENTS

• **2+ production mobile apps** on App Store & Google Play

• **CIRO Pizza Platform**: full automated ecosystem with 3 Flutter apps

• **Real-time interactive audio** live streaming systems

• **Docker containerization** & CI/CD deployment automation

CORE STRENGTHS

• User-centric engineering & clean maintainable code

• Software architectural rigor & continuous learning

• High autonomy, cross-functional collaboration & fast execution

INTERESTS

Football • Anime • Tennis • Tech Innovation

AVAILABILITY & MOBILITY

Available immediately for full-time software engineering roles, freelance contracts, or remote opportunities worldwide. Full international mobility.

EDUCATION & QUALIFICATIONS

Engineer Program in Software Engineering – 3rd year **09/2023 - 09/2026**
iTeam University — Tunis
Focus: Software Architecture, Distributed Systems, Cloud & Mobile Engineering.

Bachelor in Information Systems Development (DSI) **09/2020 - 06/2023**
Higher Institute of Technological Studies of Nabeul (ISET Nabeul)
Graduated with Honors. Core: Algorithms, OOP, Database Systems, Web & Mobile.

Baccalaureate of Computer Science **09/2019 - 06/2020**
High School of Abd Laaziz El Akremi Gafsa

SOFTWARE & MOBILE PROJECTS

• HajMoto (Flutter, Supabase, Docker)
- Inventory management, sales POS, barcode scanning, and automated PDF invoice generator for motorcycle parts shop (Flutter, Supabase). Resilient local offline caching.

• Gaspino App (Flutter, Express.js, MongoDB)
- Food waste reduction marketplace connecting local food merchants and consumers with real-time discount alerts, geolocation mapping, and basket reservations.

• Medical App (Telemedicine Mobile — Flutter, Firebase)
- Flutter & Firebase telemedicine app with doctor appointment booking, pharmacy map discovery, and real-time encrypted consultation messaging.

• TeamFlow (Workspace & Management — React, Node.js, MongoDB)
- Web-based team and project management workspace built with React, Node.js, Express.js, and MongoDB. Hierarchical tasks, permissions, sprint boards, and equipment tracking.

• Library Management System (React, Python, Flask, Docker)
- Full-stack web system developed with React, Python, Flask, and MariaDB under Docker. Automated loan tracking, author-book relational indexing, and overdue fee calculations.

COMMUNITY LIFE

IEEE ISET NABEUL (09/2022 - 01/2023)
Head of Human Resources responsible for recruitment of new members, internal communication, team cohesion, and technical workshop events.

Orange Tech Club ISET NABEUL (10/2021 - 01/2023)
Treasurer managing annual budget, sponsorship outreach, technical training bootcamps, and hackathon logistics.
