

Full-stack mobile developer

Nidhal BOUMAIZA

Software Engineer and Freelance Full-Stack Mobile Developer with hands-on experience in mobile applications, real-time backends, and cloud platforms. Proven track record publishing production Flutter apps on App Store and Google Play (Al Manarah Advanced Co, Barberio) and delivering large-scale engineering platforms at eSteps Health (CIRO Pizza Platform with Flutter, Next.js 16 Web Admin, SCADA, and Laravel 12). Passionate about building robust, scalable solutions and driving meaningful product impact.

TOOLS

Android Studio | Visual Studio Code | Docker | Postman | Git / GitHub | Figma | MongoDB Compass | IntelliJ | PostgreSQL | MySQL | Linux VPS

COMPETENCES

Flutter | Dart | Next.js 16 | React.js | TypeScript | JavaScript | Laravel 12 | WebSockets | Express.js | Node.js | Python | Flask | MongoDB | SQL / NoSQL | Firebase | Supabase | SCADA / IoT | HTML / CSS

CORE PRACTICES

Clean Architecture | BLoC Pattern | RESTful APIs | Mobile-First UI | CI/CD Automation | Agile / Scrum

LANGUAGES

English: Professional Working
French: Bilingual / Fluent
Arabic: Native

UPBRINGING

Engineer Program in Software Engineering – 3rd year — **09/2023 - 09/2026**
iTeam University — Tunis
Focus: Software Architecture, Distributed Systems, Cloud & Mobile Engineering.

Bachelor in Information Systems Development (DSI) — **09/2020 - 06/2023**
Higher Institute of Technological Studies of Nabeul (ISET Nabeul)
Graduated with Honors. Core: Algorithms, OOP, Database Systems, Web & Mobile.

Baccalaureate of Computer Science — **09/2019 - 06/2020**
High School of Abd Laaziz El Akremi Gafsa

PROFESSIONAL EXPERIENCE & PRODUCTION APPS

AL Manarah Advanced Company (goLance) — **09/2025 - 09/2026**
Mobile Developer (Flutter) • International Freelance Contract • Riyadh / Remote

- Engineered, optimized, and published **Maqra'at Al-Rajhi** on the **App Store** and **Google Play** (Quranic recitation & education mobile application).
- Implemented low-latency live audio streaming for remote recitation teacher-student sessions.
- Architected modular BLoC state management, dynamic session reservation slots, and offline caching.
- Delivered complete RTL (Arabic) internationalization and secure REST API consumption.

Barberio — Production Mobile Application — **06/2023 - Present**
Published on App Store & Google Play Store • Flutter, Supabase, Firebase

- Premier barbershop booking and salon management app in Tunisia. Features real-time schedule booking, portfolio galleries, push notifications, and verified customer reviews. 6 official Play Store screens.
- Designed and built end-to-end client booking pipeline, salon calendar sync, and automated push alerts.

• HajMoto (Flutter, Supabase, Docker)

- Inventory management, sales POS, barcode scanning, and automated PDF invoice generator for motorcycle parts shop (Flutter, BLoC, Supabase). Resilient local offline caching.

• Gaspino App (Flutter, Express.js, MongoDB)

- Food waste reduction application connecting local food merchants and consumers with real-time discount alerts, geolocation mapping, and basket reservations.

• Medical App (Telemedicine Mobile)

- Flutter & Firebase telemedicine app with doctor appointment booking, pharmacy map discovery, and real-time encrypted consultation messaging.

• TeamFlow (Workspace & Management)

- Web-based team and project management workspace built with React, Node.js, Express.js, and MongoDB. Hierarchical tasks, permissions, sprint boards, and equipment tracking.

KEY EXPERTISE

Mobile-First | Clean Architecture | BLoC Pattern | RESTful APIs | Real-time Sockets | SCADA Systems | Docker Deploy | App Store Connect | Play Console | CI/CD Pipeline

METHODOLOGIES

Agile / Scrum | Clean Code | Git Flow | TDD / Testing | Continuous Delivery | Microservices

ADDITIONAL TECH

OpenStreetMap | WebRTC | Tailwind CSS | SQLite | JWT Auth | Redis Cache

ACHIEVEMENTS

• 2+ mobile apps on Apple App Store & Google Play

• Full-scale robotic restaurant platform (CIRO Pizza)

• Real-time low-latency interactive audio systems

INTERESTS

Football | Anime | Tennis | Tech Innovation

AVAILABILITY

Available immediately for full-time software engineering roles, freelance contracts, or remote opportunities worldwide. Full international mobility.

ENGINEERING & TECHNICAL INTERNSHIPS

eSteps Health — Software Engineering Intern (PFE) **02/2026 - 09/2026**

End-of-Studies Engineering Project (PFE) • Tunis, Tunisia

- Architected and delivered **CIRO Pizza Platform**: intelligent omnichannel quick-service restaurant ecosystem with robotic automation.
- Built 3 Flutter applications: **Customer Mobile App** (AI voice assistant & live tracking), **Interactive Totem Kiosk**, and **Delivery Rider App** with real-time GPS tracking.
- Developed full Web Admin Back-office in **Next.js 16**, React 19, and TypeScript with live OpenStreetMap rider dispatch, Restaurant Intelligence AI demand analytics, and inventory threshold rules.
- Engineered **Laravel 12** backend with **Reverb** WebSockets for instant order lifecycle dispatch; integrated industrial **SCADA** robotic pizza assembly supervision. Containerized with Docker.

Internship - Neopolis Development (PFE Licence) **02/2023 - 05/2023**

Flutter / Express.js / MongoDB • Nabeul, Tunisia

- Developed mobile HR management application in Flutter and robust backend APIs with Express.js and MongoDB.
- Automated leave management workflows, IT equipment allocations, hierarchical approval processes, and shared corporate document tracking.

Advanced training - CPG Gafsa **01/2023 - 02/2023**

Flutter / Node.js • Gafsa, Tunisia

- Created mobile application based on Node.js and Flutter to streamline tracking, department assignment, and evaluations for company interns.
- Implemented supervisor review modules, attendance registers, and automated grading reports.

Internship - Evolve'Com **01/2022 - 02/2022**

CMS Prestashop / E-Commerce • Tunis, Tunisia

- E-commerce database maintenance, catalog optimization, and module configuration for commercial website (kmandi.net).
- Integrated product categorization, SQL data cleansing, and catalog performance improvements.

ACADEMIC & OPEN-SOURCE PROJECTS

• Library Management System

- Full-stack web system developed with React, Python, Flask, and MariaDB under Docker. Automated loan tracking, author-book relational indexing, and overdue fee calculations.
- Designed responsive catalog browsing with dynamic filtering, student loan history, and automated penalty rules.

• Mobile Client Projects (Campfire Stories & B.Loc)

- Frontend mobile client implementations in Flutter with custom animations, responsive layouts, and RESTful API integration with Django backends.

COMMUNITY LIFE

IEEE ISET NABEUL (09/2022 - 01/2023)

Head of Human Resources responsible for recruitment of new members, internal communication, team cohesion, and technical workshop events.

Orange Tech Club ISET NABEUL (10/2021 - 01/2023)

Treasurer managing annual budget, sponsorship outreach, technical training bootcamps, and hackathon logistics.
