Summary | Results-driven Full-Stack Software Engineer with 3+ years of experience engineering and deploying production-grade mobile and web systems. Proven track record publishing store applications on the Apple App Store and Google Play Store (**Maqra'at Al-Rajhi**, **Barberio**). Proficient in Flutter/Dart, React.js, Next.js, Node.js, Python (Flask), and PHP (Laravel), with hands-on expertise in RESTful APIs, real-time architectures (WebSockets, audio streaming), Docker containerization, and automated CI/CD pipelines. Holds a National Engineering Degree in Software Engineering.

Technical Skills

- **Programming Languages:** Dart, JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5, CSS3/Tailwind, C/C++
- **Frontend & Mobile:** Flutter (BLoC, Provider), React.js, Next.js (App Router, SSR, SSG), Redux, Responsive UI, Figma to Code
- **Backend & APIs:** Node.js, Express.js, Python (Flask, SQLAlchemy), PHP (Laravel 12, Eloquent), RESTful APIs, WebSockets (Laravel Reverb)
- **Databases & Cloud:** MongoDB, MySQL, PostgreSQL, MariaDB, Firebase (Auth, Firestore, Cloud Messaging), Supabase, AWS fundamentals
- **DevOps & Tools:** Docker, Docker Compose, CI/CD (GitHub Actions), Git, VPS Linux, Postman, Android Studio, VS Code
- **Architecture & Practices:** Clean Architecture, MVC, Microservices, Multi-platform App Store & Google Play deployment, Agile/Scrum

Professional Experience

AL Manarah Advanced Company (goLance) **September 2025 – Present**

Mobile Software Engineer (Flutter) *Riyadh, Saudi Arabia / Remote*

- Architected, built, and published the production mobile application **Maqra'at Al-Rajhi** on both Apple App Store and Google Play Store.
- Implemented low-latency interactive live audio streaming for remote Quranic recitation sessions and real-time listening.
- Engineered dynamic teacher-student reservation scheduling, automated push notifications, and offline data synchronization.
- Designed a modular, scalable Flutter architecture using BLoC pattern, full RTL (Arabic) internationalization, and secure RESTful APIs.

eSteps Health **February 2026 – September 2026**

Software Engineer Intern (Engineering Capstone - PFE) *Tunis, Tunisia*

- Spearheaded development of **CIRO Platform**: an omnichannel automated quick-service restaurant ecosystem with robotic kitchen preparation.
- Engineered 3 cross-platform Flutter applications: Customer Mobile App (AI voice ordering & live tracking), Interactive Totem Kiosk, and Rider Delivery App with real-time GPS tracking.
- Developed responsive Admin Back-Office using **Next.js 16**, React 19, and TypeScript with real-time OpenStreetMap tracking and predictive business analytics.
- Architected high-performance **Laravel 12** backend with WebSockets (Laravel Reverb) and integrated industrial **SCADA/IoT** robotics gateway; containerized the complete stack with Docker on VPS.

Barberio **January 2026 – May 2026**

Full-Stack Mobile Engineer (Production Platform) *Tunis, Tunisia / Remote*

- Designed, engineered, and published **Barberio** on Apple App Store and Google Play Store (on-demand hair salon booking platform in Tunisia).
- Built cross-platform mobile app in Flutter with interactive real-time calendar scheduling, automated push/SMS reminders, artisan portfolios, and verified customer reviews.
- Developed backend RESTful APIs using Node.js and Express.js, secured authentication with JWT, and configured MongoDB database with Firebase Cloud Messaging.

Neopolis Development **February 2023 – May 2023**

Software Developer Intern (DSI Capstone) *Nabeul, Tunisia*

- Developed mobile client (Flutter) and backend REST APIs (Express.js, MongoDB) for enterprise Human Resources Management platform.
- Automated leave request workflows, IT hardware inventory tracking, hierarchical approval chains, and secure company document management.

CPG (Compagnie des Phosphates de Gafsa) **January 2023 – February 2023**

Software Developer Intern *Gafsa, Tunisia*

- Built mobile tracking application using Flutter and Node.js for intern department assignments, daily attendance logs, and supervisor evaluations.

Key Engineering Projects

CIRO Platform – Omnichannel Automated Restaurant Ecosystem **2026**

- Integrated 3 Flutter applications, Next.js 16 admin portal, and Laravel 12 backend with SCADA robotics gateway and Docker deployment.

Maqra'at Al-Rajhi – Interactive Live Audio Platform (App Store & Google Play) **2025 – 2026**

- Production mobile application supporting interactive low-latency audio streaming, BLoC state management, and real-time scheduling.

Barberio – Mobile Booking System (App Store & Google Play) **2026**

- Published mobile platform featuring real-time appointment calendar, artisan portfolios, push notifications, and verified customer ratings.

HajMoto – Spare Parts Retail & Billing Management **2025**

- Cross-platform Flutter application with Supabase backend and Docker containerization for inventory control, sales, and automated PDF invoicing.

Library Management System – Full-Stack Web Portal **2024**

- Engineered full-stack web application using React.js, Python (Flask), and MariaDB under Docker for book cataloging and loan management.

Education

iTeam University **2023 – 2026**

National Engineering Degree in Software Engineering (Diplôme National d'Ingénieur) *Tunis, Tunisia*

ISET Nabeul (Higher Institute of Technological Studies) **2020 – 2023**

Bachelor's Degree in Information Systems Development (DSI) *Nabeul, Tunisia*

Certifications & Leadership

- **Certifications:** Problem Solving & JavaScript Algorithms (HackerRank/freeCodeCamp), Agile Project Management
- **IEEE ISET Nabeul Student Branch:** HR Lead (Recruitment, Internal Communications, Team Building) | 2022 – 2023
- **Orange Tech Club ISET Nabeul:** Treasurer & Technical Event Organizer | 2021 – 2023

Languages

- **English:** Professional Working Proficiency (Technical & Business) | **French:** Bilingual / Fluent | **Arabic:** Native
